

Sirs,I am an avid listener of XM radio. I rarely if ever listen to regular radio stations now. I feel that the NAB Petition 04-160 is very unfair and unconstitutional to myself and other XM listeners. It is our right to choose what we listen to.

I think the NAB is trying to quash a service provided by XM Radio purely due to the fact that XM Radio has a broader communication band and is instantly available to it's customers. Regular radio and T.V. can not reach all accross the U.S. the way XM can and this alone makes XM Radio a success. Also, as you know in big business money talks and larger companies do not like losing profits. Especially when a smaller company can provide the same or better service at a cheaper price.

Respectfully

Robert J. Fruge', Sr.
